M PRADEEP KUMAR

BI Data Analyst | Power BI · SQL · Excel | B.Tech Computer Science (Expected May 2027)

Hyderabad, India | +91 8106271906 | mpradeepkumar671@gmail.com | linkedin.com/in/mallela-pradeep-kumar

PROFILE

Analytical Computer Science student who builds and supports reporting that people rely on. Builds Power BI dashboards and Excel models for an education programme, runs data integrity checks before every reporting cycle, and built an assessment app now used for 5,500+ students in 129 schools, including its role-based access, testing and releases. Comfortable investigating issues raised by users, explaining data to non-technical colleagues and presenting to senior stakeholders. Keen to grow in Business Intelligence, SQL and Power BI, and to build commercial and financial understanding through structured training.

SKILLS

- **Business Intelligence:** Power BI dashboards and drill-downs, data visualisation, self-service reporting for non-technical users
- **Data & Databases:** SQL / MySQL, Advanced Excel (pivot tables, VLOOKUP, formulas), data cleaning, data integrity checks, Cloud Firestore
- **Support & Quality:** issue investigation and root-cause analysis, automated testing, release checks, role-based access control, audit logging
- **Automation & Tools:** Python scripting, workflow automation, Git and GitHub Actions, Flutter / Firebase, AI coding assistants (Claude Code, GitHub Copilot)

EXPERIENCE

Academic Data Professional | NSF Projects — **Jan 2025 – Present**

- Built Power BI dashboards tracking student performance at question, class and school level, so coordinators can check results themselves.
- Ran data integrity checks (cleaning and validation) on large datasets before each reporting cycle, improving the accuracy of the figures shared with stakeholders.
- Automated recurring reports with Excel models (pivot tables, VLOOKUPs, advanced formulas), replacing manual work.
- Analysed trends over time and presented findings to teachers and coordinators as clear, actionable insights.

Student Mentor | Reliance Foundation — **Apr 2026 – Present**

- Mentor students through the Reliance Foundation programme; delivered 4 sessions to students across different colleges and universities.

PROJECTS

NCP Assessment App – Offline-First Data Platform | Flutter, Firebase — **Sep 2026 – Present**

Built with AI coding agents: directed the design, then reviewed and tested every change

- Delivered an app that captures, scores and syncs school assessment data; **live for 5,572 students across 129 schools**, with subject-wise report cards generated from the results.
- **Reporting security:** six user roles, each limited to its own schools, clusters or districts and enforced on the server; score corrections are recorded in an audit log.
- **Quality assurance and releases:** 993 automated tests run on every change; investigated issues reported from live field batches, found root causes and shipped fixes in tested releases.
- Presented the app and programme status to the NCP board (Oct 2026).

LEADERSHIP & ACTIVITIES

- **Organiser, Technostav 2025:** organised and ran the college technical event for 200+ participants, coordinating the team, meetings and event-day schedule.
- **Peer Mentor (Sep 2026):** ran hackathon-preparation and resume-writing sessions for about 100 junior students.
- **Winner, CodeMania 2024** (with Microsoft): built EvaSafe, a women's safety app prototype.

RESEARCH & CERTIFICATIONS

- **Publication:** Co-authored "LLM-RAG: A Hybrid Framework for Zero-Day Threat Detection" (NCICSET'25).
- **Certificate:** EPAM Systems workshop on Retrieval-Augmented Generation (RAG) and Large Language Models (LLMs).

EDUCATION

B.Tech – Computer Science & Engineering — **Sep 2023 – May 2027**

Sri Indu College of Engineering and Technology, Hyderabad

- Relevant coursework: Database Systems, Data Analysis, Statistical Methods, Programming.
- **Languages:** English (professional working proficiency), Telugu, Hindi.
